

# JSP Scripting Element Lab Exercise

Provided by M Firdaus Harun

Please submit before  
**7pm – TODAY**  
**23-2-2010**

# Questions

1. Make a JSP page that lets the user supply a request parameter indicating the background color. If **no parameter** is supplied, a **background color should be selected at random.**
2. Make a JSP page that lets the user supply a request parameter indicating the background color. If **no parameter** is supplied, **the most recently used background color** (*from a previous request by any user*) should be used.

\*Hint – page 334 - 339
